DETAILED ACTION

Drawings

1. Figure 5 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

2. Claims 1, 2, 4-6, 9 and 10 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a motivation for using the recited alternate adsorption membrane on the inner walls of the micropores of the fibers in combination with the other claimed structure. The closest prior art discloses a fuel cell intake filter (US 2003/0064271) including activated carbon fibers with a particle filter, and glass fibers (JP 2003-334229) coated with an alternate adsorption membrane. It is the examiner's opinion that one having ordinary skill in the art would not have been motivated to apply the JP '229 membrane to activated carbon fibers in a fuel cell intake filter because the membrane is used to enhance adsorption of smoke impurities and not air, and because there is no evidence or motivation to apply the membrane to activated carbon instead of the disclosed possible unrelated substrates.

Art Unit: 1797

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The additional references listed on the attached PTO-892 disclose fuel cell filters and adsorption arrangements.
